

BIO

Hsiao-Han Chang joined the Institute of Bioinformatics and Structural Biology at National Tsing Hua University in Taiwan in August 2019. Her work focuses on understanding pathogens' evolution and spread using population genetic tools and mathematical modeling. Before her current position, she obtained her Ph.D. with Dr. Daniel Hartl and Dr. John Wakeley at Harvard University, and did her postdoctoral research with Dr. Marc Lipsitch and Dr. Caroline Buckee at Harvard T.H. Chan School of Public Health.
