

Speaker Bio

Yu-Hsuan Joni Shao is a Professor at the Graduate Institute of Biomedical Informatics, Taipei Medical University, and Director of the Health Data Analytics and Statistics Center. Holding a PhD in Epidemiology from Rutgers School of Public Health, she specializes in precision medicine, pharmacoepidemiology, and real-world data analytics. Her prolific research spans genetic epidemiology, cancer outcomes, and big data applications in healthcare. Dr. Shao has published extensively in high-impact journals and actively leads government- and industry-funded projects in Taiwan. She actively collaborates across disciplines to drive data-informed innovation in personalized healthcare and population-based evidence.
