

FUTURE TRENDS FORUM 2026

Prefix & Full Name	Dr. Eric Y. Chuang
Designation & Organisation	Professor, Department of Electrical Engineering and Graduate Institute of Biomedical Electronics and Bioinformatics, National Taiwan University Senior Technology Expert, Biomedical Technology and Device Research Laboratories, Industrial Technology Research Institute
Country	Taiwan

Brief Bio

Dr. Eric Y. Chuang is Professor at National Taiwan University and Senior Technology Expert at Industrial Technology Research Institute. He has three decades of experience in biomedical research. At the U.S. National Cancer Institute (NCI), he served as Director of the Microarray Laboratory in the Radiation Oncology Branch. He subsequently joined the Radiation Research Program within NCI's Division of Cancer Treatment and Diagnosis as a Program Director, overseeing NCI's multidisciplinary research programs. He directed NTU's Graduate Institute of Biomedical Electronics and Bioinformatics and served as Dean at China Medical University. His expertise spans genomics, bioinformatics, AI, cancer, and precision health. He earned a ScD in Cancer Biology from Harvard University and an EMBA from NTU. With over 181 publications, he is Editor-in-Chief of Translational Cancer Research and an editorial board member of Scientific Reports.
